

SAIKUMAR NADDUNURI

Automation Test Engineer | Microsoft Certified: AZ-900 | Hyderabad, India |

+918106853031 | naddunurisaikumar@gmail.com [LinkedIn Profile](#)

PROFESSIONAL SUMMARY

Quality Engineering professional with 3 years 9 months (around 4 years) of experience in high-scale web automation and functional testing. Expert in building **Java-Selenium, Playwright - Typescript** frameworks and **Cucumber BDD** suites. Proven track record of managing **1,000+ automation scripts** and maintaining a **>95% pass rate** across complex re-platforming projects. Microsoft Certified in **Azure Fundamentals (AZ-900)** with deep experience in **Jenkins CI/CD** and technical documentation via **Confluence**.

TECHNICAL EXPERTISE

- **Automation & Testing:** Selenium WebDriver, Playwright - Typescript, Code-gen, Cucumber BDD, TestNG, Page Object Model (POM), Selenium with C# & Java, Spec-Flow.
- **Languages & Tools:** Core Java, SQL, Maven, Apache POI, Postman (API Testing).
- **DevOps & Cloud:** Jenkins Pipelines, GitHub Actions, Microsoft Azure (AZ-900), Git, Azure TFS (PAT integration).
- **Monitoring & Collaboration:** Confluence (Documentation), Splunk (Log Analysis), Agile/Scrum.
- **AI-Augmented Engineering:** GitHub Copilot, Claude, and Claude Cowork for day-to-day development, debugging, and productivity — including screenshot-based test failure analysis; Claude Code for repository changes, pull request creation, and context-aware code suggestions.

PROFESSIONAL EXPERIENCE

COGNIZANT, Coimbatore | October 2022 – Present Quality Engineering & Assurance | Project: Lexis Nexis – RELX

- **Automation Scaling:** Engineered and maintained a suite of **1,000+ Automation Test Scripts** for Lexis Advance and Lexis+ AI, significantly reducing error detection latency.
- **Playwright-TypeScript Migration:** Migrated the automation suite from Selenium to Playwright-TypeScript for Lexis Advance and Lexis+ AI, using Codegen to accelerate script scaffolding across regression suites; triggered execution via Jenkins for scheduled regression runs, maintaining CI continuity through the transition.
- **Release Integrity (SRP):** Spearheaded **8 Search Re-platforming (SRP)** cycles, building smoke and regression suites from scratch (~600 TCs) and maintaining a **97% stability rate**.
- **CI/CD Ownership:** Managed daily analysis of **1,500+ automation tests** via **Jenkins**, ensuring pass percentages exceeded **95%** through proactive script maintenance and stakeholder reporting.
- **AI-Augmented Development:** Integrated Claude Cowork and Claude Code with GitHub to drive the Selenium-to-Playwright migration and daily engineering tasks, feeding application snapshots and documentation into the context window to cut token usage while improving accuracy.

- **AI-Assisted Test Generation & Triage:** Connected Azure TFS via Personal Access Token (PAT) to pull user stories and acceptance criteria, directing Claude Cowork to draft automation test cases per story and support daily regression failure triage.
- **Test Analysis Agent:** Built an AI-powered dashboard — using Claude Cowork for screenshot-based failure analysis — that simplifies raw Jenkins test reports into clear, actionable insights, improving test-health visibility for stakeholders.
- **Defect Discovery:** Identified and logged **150+ project-specific defects** and **60+ ad-hoc defects** in high-complexity modules, preventing critical escapes to production.

CERTIFICATIONS

- **Microsoft Certified: Azure Fundamentals (AZ-900)**
- **Anthropic Academy:** Claude 101, Claude Code 101, Claude Code in Action, Introduction to Claude Cowork, AI Fluency: Framework & Foundations

EDUCATION

- **Masters in computer applications**
St. Johns Institute of science and technologies | 2024
- **Bachelor of Science (Computer Science)**
Chanda Kanthaiah Memorial Arts and Science College | 2021
